

## **Programme of the FRAME project - part of the Institute of Education and Communication of the CZU Prague**

**We cordially welcome you to the Institute of Education and Communication of the Czech University of Life Sciences Prague,**

**a renowned institution with a long tradition in the field of education and counselling. We offer study programmes that are adapted to the requirements of the labour market. Our graduates of bachelor's degree programmes and lifelong learning programmes have excellent opportunities for practical employment.**

**One of our advantages is our network of cooperating workplaces, which enables us to establish partnerships with major institutions across the Czech Republic. This provides our students with unique opportunities to gain practical experience and skills. Collaboration with these institutions is key to their professional development.**

**Our campus in Malá Chuchle is situated in a pleasant environment near the centre of Prague and offers a friendly atmosphere that supports students' learning and development. Here, history is intertwined with nature as we are surrounded by the protected areas of Chuchelský háj and Barrandovské skály. We provide students with modern and upgraded learning spaces that are constantly being improved, and we use innovative approaches to education.**

**Our teaching focuses on the use of modern technology. Students have access to the latest tools and applications and are trained in their effective use. Teaching takes place not only in the classroom, but also through online learning platforms, giving students hands-on experience with modern technology in real-world situations.**

**Enjoy your learning experience with us!**

Co-funded by the  
Erasmus+ Programme  
of the European Union
