

Research and thesis supervision skills

10-11.10.2022

Eshetu Yirdaw and Mike Starr

University of Helsinki, Department of Forest Sciences/VITRI

Group work instructions

The course participants will be divided into four groups according to their home university. Each group will have one hour to discuss and prepare a PPT presentation. Each group will nominate a member to give 10-15 minutes to present their group work. The presentations will be followed by discussion and comment.

Group work 1. Thesis supervision in your own university/faculty

- How are theses planned and supervised
- How much credit/weight is given for the thesis towards degree
- How many supervisors per student
- How many students a teacher is expected to supervise
- How is the thesis evaluated
- What are the main problems in thesis supervision
- How could these problems be addressed
- Any other relevant issues

Group work 2. How to develop student's research plan

- The research plan process
- The role of the supervisor
- Research plan presentation
- Any other relevant issues
